

## Formulary Drugs with Quantity Limits

Quantity limits (QL) on medications are established to maximize the dosing regimen, and decrease cost. QLs are placed on drugs available in multiple strengths. The limit allows for titration to an effective dose, but requires long-term use with an appropriate strength of the medication. Taking medications less often (10mg once daily versus 5mg twice daily, if appropriate) increases compliance.

DRUG Product Name*	Quantity Limits (QL)
<i>amphetamine-dextroamphet</i>	30 per 30 days (generic ADDERALL)
